MISSION OF INSTITUTE

Empowering Women in Technical field. To provide competent and mature human resources to the country and society by means of superior technical education and research.

At our Women's Polytechnic Institute, our mission is to cultivate a dynamic and inclusive environment where aspiring female engineers can thrive.

We are committed to fostering excellence in education, promoting cutting-edge research, and nurturing leadership skills.

Through mentorship programs and collaborative initiatives, we aim to break barriers, inspire innovation, and contribute to the advancement of women in the field of engineering.

Our institute strives to create a community where every woman engineer can confidently pursue her passion, make meaningful contributions, and shape the future of technology.

HISTORY ABOUT MUZAFFARPUR

Muzaffarpur, located in the Indian state of Bihar, has a rich history dating back to ancient times. It is believed to have been named after Muzaffar Khan, a Mughal officer during the 18th century.

The region has witnessed various historical events, including the rule of Maurya and Gupta empires.

During the medieval period, Muzaffarpur was part of the Delhi Sultanate and later the Bengal Sultanate. It became an important center for trade and commerce, especially in the cultivation of indigo during British colonial rule.

Muzaffarpur gained prominence in the Indian independence movement, with notable figures like Rajendra Prasad, the first President of India, hailing from the region.

Today, it is known for its cultural heritage, educational institutions, and as an agricultural hub, particularly famous for its luscious litchi cultivation.

Muzaffarpur is famous for Shahi lychees and is known as the Lychee Kingdom.

THANK YOU

GWP BELA, MUZ. AND TEAM
